

Phase 6: User Interface Development

In this phase, I focused on building the **front-end experience** for Smart Service Appointments and Warranty automation. The main deliverables include:

- **Lightning App (Smart Appoint & Service Center):** Created a branded app with navigation to key objects like Service Appointments, Warranties, Technicians, Reports, and Dashboards.

- **Tabs & Pages:** Configured custom tabs and designed tailored Home and Record Pages using the Lightning App Builder to act as a command center for appointments and warranty tracking.

- **Apex Controller:** Built ServiceUIController to handle picklist values, create new records, and connect LWCs with server-side logic.

ServiceUIController.apxcServiceUIControllerTest.apxc

Code Coverage: NoneAPI Version: 64

```
1 public with sharing class ServiceUIController {
2
3     // Return the first picklist values found on Service_Appointment__c (map key = field API name).
4     @AuraEnabled(cacheable=true)
5     public static Map<String, List<String>> getPicklistValues() {
6         Map<String, List<String>> result = new Map<String, List<String>>();
7         try {
8             Schema.SObjectType sType = Schema.getGlobalDescribe().get('Service_Appointment__c');
9             if (sType == null) return result;
10
11             Map<String, Schema.SObjectField> fields = sType.getDescribe().fields.getMap();
12             String picklistField = null;
13             for (String f : fields.keySet()) {
14                 Schema.DescribeFieldResult dfr = fields.get(f).getDescribe();
15                 if (dfr.getType() == Schema.DisplayType.PICKLIST || dfr.getType() == Schema.DisplayType.MULTIPICKLIST) {
16                     picklistField = f;
17                     break;
18                 }
19             }
20         }
21     }
22 }
```

The screenshot shows a web application interface with a top navigation bar containing a search bar and a menu with items: Smart appoint & Se..., Home, Service Appointments, Warranties, Technicians, Reports, and Dashboards. Below the navigation bar, there is a header section for a 'Service Appointment' with ID 'AAPT-00001'. The main content area is divided into two sections: 'Log Service Appointment' and 'Create Warranty'. The 'Log Service Appointment' section has fields for Subject (AC Installation), status (Cancelled), Scheduled Date (Sep 25, 2025), and Technician Id (User Id) (005XXXXXXXXXX), with a 'Save' button. The 'Create Warranty' section has fields for Asset (AC Unit #1234), Warranty Status (Active), and Linked Appointment Id (AAPT-00001). A 'Related List Quick Links' section is visible on the right side of the 'Log Service Appointment' section.

Related List Quick Links

-
- **Permissions & Access:** Configured a dedicated permission set (SmartService_UI_Access) to manage CRUD/FLS and Apex access for technicians and coordinators.
- **Testing & QA:** Implemented Apex unit tests, validated UI flows, and ensured proper navigation, error handling, and security checks.

This phase delivers a **complete, interactive user interface** that integrates dashboards, record layouts, and LWCs—allowing technicians and coordinators to seamlessly manage appointments and warranties in one unified workspace.
